Subject: RE: water availability application (External Email: USE Caution)

Sue,

Primarily the only usage would be our office and shop during working hours. We have eight in the shop and eight in the office. The drivers only check in and out here.

Thank You,

Chad

Subject: water availability application

I received the water tests (both satisfactory), results will go out in today's mail. I still a copy of the well log or pump test to show gallons per minute to complete the application.

Also, is this well for the business only? If so, how many employees? If over 25 employees or public access to the system, it will require you to become a Group B system registered with the state, or connect to PUD.

Thank you.
